Expected breasts.

Instead, I got a solid puzzle platformer...

and breasts.. I have no idea why this game exists.

I have no idea why I bounced 1,000,000 ducks.

I have no idea why I am not giving this a thumbs down.

This game is weird.

<https://www.youtube.com/watch?v=IEBxFx7DNWc>. A solid Twin Stick Shooter.

If you want to mow things down with no ethical quandry, this is a good game series. I had fun all the way through. It doesn't do anything unique or ground breaking, but it's solid for what it is. The game has a good number of weapons, each good in different situations. Flame thrower is fun.

I think one of my few complaints about this game series is a minor preference thing. There's 3 different upgrades for each weapon but you can only choose ONE. If you upgrade to another you will only be using the new one, not both. Just a money saving tip.. A flight simulator in which you play the part of a russian commander and get to use really cool airplanes called Ekranoplanes (I didn't know they existed)

Graphics are good, from the 3D airplane models to the russian-flavored menus. You can start a campaign and slowly build your team of comrades, or select Single Mission (the easiest choice) and start flying immediately.

Your comrades, the weapons you carry and your instruments affect your stats in battle.

For lower performance PCs (like mine) the game loading is a bit slow.. If you like to rage while you burn in a hell fire, this is the expansion for you! This expansion has made my game a living hell! the fireland tokens get out of control WAY too quickly and makes a decent round of talisman unplayable. Would not recommend this expansion.. A sweet little Vlambeer-esque arcade game with fun, streamlined dynamics, slick little noises and frantic, fast gameplay. Really enjoying it as "distractionware", goes great alongside Nuclear Throne and Super Hexagon. Sweet job guys!. I really enjoyed this game. I've been a big fan of the Craft Sequence series of novels by Max Gladstone. This game tied in very well to Last First Snow and Two Serpents Rise. Having

read those novels enriches this game, and this game also enriches those novels. That's a great way to use the genre. In fact, I think it ties in much better to the novels than the first game did. But the first game had a better stand alone plot.

The decisions in this game really make you weigh your choices. There are often no 'right' choices. Do you save the farmers land and let the citizen of the near by city die of thirst? Or do you save the water and let the farmers fend for themselves?

I hope Max makes more games, and I hope he keeps tying them more closely to the books.

If you enjoy the books, I highly recommend this game. If you enjoyed the first game, but haven't read the books, it may not be the sequel you were hoping for. But if you enjoyed the first game, READ THE BOOKS! They are amazing.. Great escape the room game. It took me a bit too long to figure out one of the puzzles, but I'm glad I persisted.

My only qualms with the game are: the player character tends to be really annoying in telling me that a thing I was holding was "useless" when I was exploring everything the first time through (though I was grateful for it later on when I was stuck). Also, the teleportation transfers the center of your play area to the point you indicate, and not where you're currently standing, which leads to some "why am I not teleporting?" and "why did I just appear in a wall?" moments.

Also, the story is unintelligible and completely ignorable. Not invested in the slightest, and it's hard to even tell the characters apart sometimes.

Other than those minor quibbles, I recommend this for the puzzles.. ENG:

I can't trust anymore U-Play Online company because, they never update their games & still this game not providing almost any features that i looking for.

I can't recommend the product.

En voi suositella tuotetta.. I came to the series because I got Creeper World 3 on a cheap sale due to its overwhelmingly positive rating, and I loved every second of it. It easily became one of my favorite games, but since I am not reviewing Creeper World 3 but the first one, I probably should start talking about this one instead.

So what is it? Creeper World 1 is pretty much a RTS in which you fight a liquid. The game is based on a top down topographic map and your enemy behaves like Liquid. There are spawners on the map and they keep spawning the liquid and the liquid will propagade like liquid. This means it will fill holes before it can move forward, and it will need to fill an entire depth level before it can pass onto the next level. And you? Well you are tasked with stemming the tide. You will fight with Blasters, Mortars and all sorts of other weaponry against an ocean, while at the same time competing with the enemy for land, as the only way you can generate energy (and with Energy you create ammo) is by covering parts of the map with generators. These generators will use the area to gather particles, which then will feed your base.

Your base is your main hub, it generates the 3 resources, based on the particles your collectors collected. And you will need to build the infra structure to supply your guns, gather more particles and complete various objectives.

Admittedly Creeper World 3 is the more pretty game, but this one does have the same gameplay as the 3rd, and that makes it instantly to one of my favorite games. There is something about it, when you see how the tide slowly raises and you are scrambling to build that mortar with which you can punch a deep hole into the ocean of blue goo that is about to drown you.

The missions themselves range from easy to progressively harder. Some of them need you to prioritize several aspects and sometimes you end up looking at a problem thinking "okay, how am I gonna get down onto that level?" And then you try a few

solutions and workarounds... and eventually you succeed or fail.

The Artstyle of the game might be simple, and when you are close to completing the mission your network will remind you probably more of a circuit board than an actual war machinery, but in its simple beauty its quite an interesting game.

I can only recommend picking the game up.

Invisible Apartment 2 is slightly better than the first one (and the prequel): the writing got better, the art style too. It didn't feel rushed like its previous games, and now I could understand better the characters personality. BGM was also really nice, I loved the songs.

I'm glad to know that the developers will finish the game soon, since the third and final chapter is already on kickstarter. I'm looking forward to see how it ends!

6/10. I recommend getting this game on a sale, since it's a quite short VN, with just a few choices. Be sure to play Invisible Apartment Zero too before playing this second chapter.. This game kind of teaches you how to display elements using HTML and CSS but it is more like practice. It will definitely help you remember some things if you are rusty. BTW, self-study is a good way to learn something so don't get mad at this game just because you can't put that you beat it on your resume.. Looked like a decent game, but it's too "click here" . To pass levels you have to click various places.. not so great.. Absolut piece of♥♥♥♥♥♥♥♥

No support what so ever if you experience a problem.

If you don't then it's quite a good management game... Lovely game with loads of puzzles and achievements for each one :D Devs are quick to answer on the forum if you have any issues, which is a big +. Does not load in xplane 11. It is not even funny how bad this game is. Do not buy it. Buy Blur or Mashed or Micro Machines or anything but not this game. I bought this for me and 3 friends. We had fun for about one minute. After this time the performance got so bad and bugs started to occur.

You can buy a good beer for the same money and you will have more and longer fun with it then with this crappy bug thing.
